TUESDAY, JUNE 27, 1916.

An Evening Echo.

The golden moments in the stream of life rush past us, and we see nothing but sand; the angels come to visit us, and we only know when they are gone.—GEORGE ELIOT.

President Wilson wrote the St. Louis platform of the Democratic party, and then approved it, which is the first consistent action he has been known to take since his election in 1912.

A Long Step Ahead.

The approval of woman suffrage by a Republican national convention is the longest single step ahead which the cause has yet taken, says the New York Tribune.

The victory is only a moral victory; it carries with it no actual enfranchisement; but it registers at once a sentiment and a prophecy which may be said to mark the beginning of the end of opposition.

The World's Steel Center.

Almost fifteen weeks of continuous battle around the hills of Verdun, with heavy artillery discharge through a part of every one of the 103 days! That is the world's steel center.

Nobody has attempted to estimate how many tons of metal have been distributed in that region.

Eastern France will some day be a valuable mining area for metals that may then be precious.

What and Where?

President Wilson is not so happy in his phrases. The best remembered is his "Too Proud to Fight." It will plague him throughout the campaign. The president's latest appeared in his Memorial day declaration: "I shall never myself consent," he said, "to an entangling alliance, but I would gladly assent to a disentangling alliance."

What is a disentangling alliance?

What alliance is it that the president wants to make us part of that has disentanglement as its object and where we are entangled that we need disentangling?

Own Up to It.

When the Democratic party levies a protective duty on dyes in order to encourage the building up of a permanent dye industry in this country, it acknowledges the fundamental soundness of the Republican doctrine on the tariff question.

If a protective tariff will establish and maintain a dye industry, it will maintain other industries. That it will do so has been abundantly demonstrated in the past, but the Democrats have never formally acknowledged the

necessity for the protective duty. They are now about to go on record.

## Can Help.

The help that a state highway department can give to local road officials in saving the taxpayers' money embraces many things which are not often anticipated. For instance, the Montana highway commission compiled a schedule of the prices paid for road material in the counties of that state and found a variation of 100 per cent in the cost of culvert pipe to the different counties.

The attention of the local authorities was called to this variation, and as a result the prices throughout the state have become more uniform and the former very high prices ruling in a few counties have been reduced.

## About the Fender.

Recently in Los Angeles an electric car and a jitney came together quite unexpectedly, says the Wall Street Journal. There were no fatalities, but the jitney was practically demolished, and the accident was brought into court. One of the passengers on the electric car was a "jackie" from the monitor Cheyenne. His version of the accident, as expressed in a letter to the claim agent of the trolley company, follows:

"I was standing on the starboard fore-castle of the car when the gasoline cutter hove in sight off our port bow. We were making about fifteen knots, and the cutter was coming about the same along another channel. It was clear weather and not much ground swell.

"Our chief engineer blew his steam and reversed his propeller, but he couldn't heave in time to keep from ramming her. There wasn't even time to get out the life preservers or sound the emergency call. We smashed in a couple of the little craft's compartments. Her captain stuck to his post. The jitney went down like a submarine.

"I think the cause of the wreck was that the jitney's binocular light was out."

Gaining in American Markets.

Cuba is at peace. Canada is embroiled in the foreign war. Things used to be different. It was Cuba that was generally engaged in a nation, Canada and Cuba are vying with each other as to which shall have the largest share of the United States market, which was turned over to foreign enterprise by the Democratic tariff law.

During the ten months ended April, 1915, Cuba nosed Canada out by a little over \$5,000,000, sending us \$138,500,000 worth of goods, while Canada sent us but \$133,000,000. Of course, a large part of Cuba's exportation to us consists of sugar, but the present law cut the duty on that, to the sorrow of the cane and beet sugar producers of this country. During the ten months period ended April, 1916, Canada and Cuba ran a dead heat for the American market, both sending us \$165,000,000 worth of goods. For Canada this was an increase of \$67,000,000 over the ten months ended April, 1915, under the Republican tariff law.

Indicating the manner in which the Democrats hurt the farmers of this country by encouraging the importation of Canadian agricultural products, Cuba beat the 1915 record by \$62,000,000.

So, for the ten months ended last April, we find these two countries, one at our northern, the other at our eastern door, passing us \$330,000,000 worth of products compared with \$202,000,000 during the ten months ended April, 1915, under the Republican tariff law, and one of these countries at war.

Battering at our western portal, Australia and New Zealand, China and Japan, and the British East Indies, during the ten months ended in April, sent us \$350,000,000 worth of goods compared with \$223,000,000 for the same period in 1915, under the Republican law.

And while we have been spending millions of dollars blowing first hot and then cold on that little pepper-pot at our southern entrance, Mexico, with the help of Mr. Wilson and Mr. Underwood, during the 1916 period, sent us \$79,000,000 worth of goods compared with less than \$4,000,000 for the same months under the Republican regime. Evidently these countries believe that all is fair in free trade and war, but how many in the United States believe in the fairness of free trade to the American producer? We shall know in November.

## THE DAILY NOVELET

## THE FUGITIVE.

At dancing, I have heard it said, A blonde is hard to beat, For she's not only light of head, But light upon her feet.

"How do you know I am a dress-maker by profession?" asked the visitor curiously.

"By the terrible way your clothes hang on you," responded the great detective simply. "But you have come to see me about your husband. All dressmakers have trouble with their husbands."

"When I woke up this morning, my husband's place had not been slept in," said the dressmaker. "I searched the house, but there was nothing anywhere except furniture and things."

"I love a mystery," chuckled the great detective, rubbing his knees together. "Does your husband wear a belt or suspenders?"

"I never inquire into the intimate details of my husband's life."

"H'm. Can he tie his own ties?"

"Never."

"Hem. Does he carry his keys in his right hand trouser pocket?"

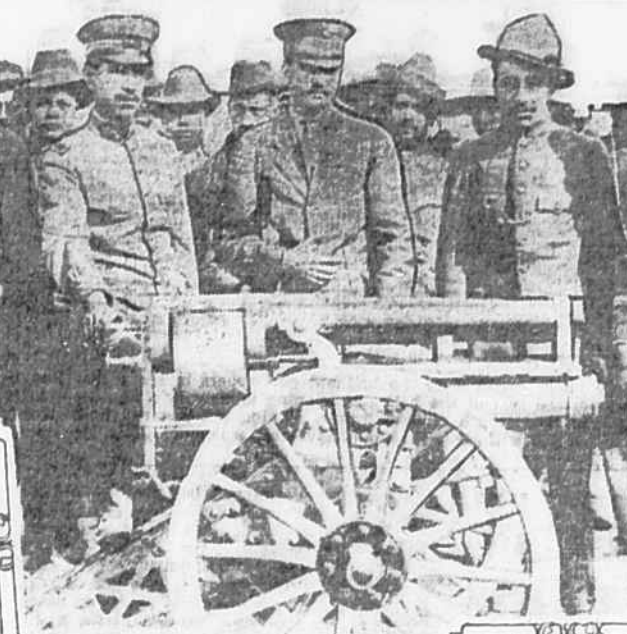

"Invariably."

"Hemph. Madam, the explanation is, your husband was out all night. With a blanching face, the dressmaker put some powder on her nose to make it blancher, and departed."

LIFE'S LITTLE LIES.

One-term plank in the Democratic platform of 1912.

## REVOLVER CANNON, MEXICAN INVENTION, WILL BE USED AGAINST U. S. SOLDIERS

The revolver cannon shown above was invented by E. Duron, a Mexican colonel. It can shoot thirty four-inch shells a minute. The gun can be readily taken apart and conveniently moved about. It weighs approximately 700 pounds. It is probable that this weapon will be used against the United States forces in Mexico.

## INTEREST IS FOCUSED ON TAMAULIPAS NOW

On Account of the Border Outrages Committed by Bandits Who Invade Texas.

WASHINGTON, June 27.—The prominence which the Mexican state of Tamaulipas is occupying in the border news of the day makes the following bulletin, issued by the National Geographic Society from its Washington headquarters, of timely interest: "Owing to the border outrages committed by bandits who have invaded Texas at points opposite the Mexican state of Tamaulipas, public interest is focused on this political division of the southern republic which has immensely rich resources, both mineral and agricultural, but which has not been developed by American and European capital as have other sections of the country."

About Size of Maine.

"Tamaulipas is about the size of Maine, but with only about one-third the population of the New England commonwealth. Its gulf coastline, low, sandy, hot and moist, extends north and south for 250 miles from the mouth of the Panuco river, where is situated the important seaport of Tampico, with its fabulously rich oil fields. This coast is indented with many shallow lagoons formed by the islands and sandbars at the mouths of the Rio Grande, Conchos, Soto la Marina and Tamesi rivers. In winter it is swept by violent 'northern' winds which are exceedingly dangerous to navigation and which cause great discomfort to the natives."

That portion of the state border-

ing on Texas is flat and is very dry for eight months of the year but when irrigated is extremely fertile, producing bountiful grain crops as well as sustaining numerous herds of cattle.

The southern and central sections produce sugar cane, bananas, coffee and tobacco in the well-watered valleys. In the mountainous regions, back from the coast, the state possesses immense wealth in its undeveloped gold, silver, copper, marble, asphalt and salt mines. Even in the Tampico district the great underground reservoirs of petroleum have been tapped only within recent years.

Game is Plentiful.

"The mountains of Tamaulipas, which boast a salubrious climate, teem with game, and sportsmen of Mexico City make annual excursions to this region to hunt deer and the vast flocks of wild-fowl which nest in the neighborhood of the numerous lakes that dot the state."

"Tamaulipas owes its commercial importance largely to its little fibre industry and to the great volume of trade passing through Tampico, which ranks next to Vera Cruz among Mexican gulf ports. Its total commerce for 1913 was more than \$63,000,000, while Vera Cruz's trade was \$83,000,000. From Tampico to New Orleans by steamer is 705 miles, about the same distance as from Philadelphia to Savannah. From Tampico to Galveston is 450 miles. The capital of the state, Ciudad Victoria, has a population of about 10,000 and is situated in the mining district, 850 miles north of Mexico City and 150 miles northwest of Tampico."

## SIR DOUGLAS HAIG IS SILENT WORKER

No Military Leader More Averse to Publicity Than This Commander-in-Chief.

BRITISH HEADQUARTERS, France, June 27.—No military leader is more averse to publicity or works more silently than Sir Douglas Haig, the British commander-in-chief in France. To those who are important for the offensive his answer is patience and yet again patience while the new munition factories begin to produce and he continues his building. His generals say that he never tell them his plans; only what they are to do.

Probably not one man out of ten of the million or more under his command would recognize him if they saw him. Not given to review or any kind of display, this quiet and studious Scotchman was the choice of the progressives, practical-driving element of the army as the one fit by equipment, training and experience to succeed Sir John French. At fifty-five he is nine years younger than Sir John and ten years younger than Joffre or von Hindenburg.

Enters on a Wager.

There is a story that he entered the army as the result of a boyish wager. He went through Oxford with distinction before he went to the military school at Sandhurst. His choice of arms was the cavalry which has had so little to do so far in this war. But no sooner had he received his commission, later in life, than most officers, because of the time that he had spent at Oxford, than he set out with the thoroughness of the student to master every branch of his profession.

It was in Berlin in the nineties that I met a Captain Haig who was studying German and the German army," said an Englishman. "I was

struck by his industry—not a brilliant man, perhaps, but a sound and well balanced one. A little hesitant of speech; what he did say went to the heart of things."

Studies French Army.

He studied the French army, too, and the history of all campaigns that the systematic thoroughness that he applied to everything. It was the same with his pastimes as his profession. Whether he had talent for it or not he made himself a first class golf player though the form which he developed did not excite the envy of professionals.

At the British Army Staff College, where officers learn organization, he was a marked man before he acted as chief of staff to General French in South Africa in the operations that made French's reputation. He was a soldier's soldier who had won solid professional esteem though the public had hardly heard of this reserved, unobtrusive worker.

MAYR'S WONDERFUL REMEDY FOR STOMACH TROUBLE

ONE DOSE WILL CONVINCE

Gall Stones, Cancer and Ulcers of the Stomach and Intestines, Auto-Intoxication, Yellow Jaundice, Appendicitis and other fatal ailments result from Stomach Trouble. Thousands of Stomach Sufferers owe their complete recovery to Mayr's Wonderful Remedy. Unlike any other for Stomach Ailments. For sale by Wells-Haymaker Co., H. F. Burke Pharmacy, Parrell's Drug Store and druggists everywhere.

LIGHT OCCUPATION.

Selling hairpins to a bald-headed man.

Stomach Troubles and Constipation.

I will cheerfully say that Chamberlain's Tablets are the most satisfactory remedy for stomach troubles and constipation, that I have sold in thirty-four years' drug store service," writes S. H. Murphy, druggist, Wellsburg, N. Y. Obtainable everywhere.—Advertisement.

## FASHIONS, OR WOMAN'S HEALTH

The first thing many persons think of finding on the Woman's Page of a newspaper is the Fashions. That is not what women most need to find there. Health is the first thing, and many women lack it. Notes telling how to preserve the health are of the greatest value and interest for women; and, if they are suffering from woman's ailments, they read with the most intense interest how other women get well from their ailments, and so they too get what made them well—Lydia E. Pinkham's Vegetable Compound.—Advertisement.

the British army in August, 1914, he and Sir William Robertson, another studious man who had risen from the ranks and is now chief of staff in London, were the two who were appointed by the generation of officers who had developed since South Africa as having prepared themselves for the direction of large bodies of troops on the scale of continental warfare. They were not the magnificent, dashing leader type, but organizers.

Going out in command of the First army corps of the British expeditionary force Sir Douglas had seventeen months' experience, Mons, Ypres and Loos, of the warfare of the western front—which all agree is the toughest school any soldier has ever known.

No Figure Head.

There was no doubt who commanded the first army. It was Haig. He was no figure head for the work of an able chief of staff. London gossip did not bandy his name about; he was not a personality to the public though he was to the army.

When anyone asked at the front who was the best man to take Sir John's place the answer was invariably "Haig." He had not captured the army's imagination, but his reason. The tribute was one to brains.

MOUNT CLARE MURMURINGS

Events of the Community Are Set Down by a Telegram Correspondent.

MT. CLARE, June 27.—The Grant district Sunday school convention will convene in its annual business session in the Methodist Protestant church in this town on next Friday at 10 o'clock. A large representation from the eight schools of the district is anticipated. The attendance at the Methodist Episcopal Sunday school last Sunday reached high water mark with 100 members present.

Miss Isadore Stout, of Bridgeport, was a guest of Miss Edna Douglas and Mrs. M. D. Lynch recently.

The Misses Marguerite and Clara Morris, of East Clarksburg, were recent visitors in Mt. Clare.

Mrs. Vivian Steed, of Charleston, is visiting at the home of her parents, Mr. and Mrs. H. B. Workman, at the parsonage.

D. W. Cork and family motored to Davison's run Sunday to attend the dedicatory services of a new church.

A Little Blossom To Delight the Home

When it is known that in the near future the home is to be blessed with a new arrival the first thought should be "Mother's Friend."

This is an external remedy gently applied over the stomach muscles. It makes them firm and pliant, they expand naturally without undue strain. It removes from the nerves those influences which are responsible for much of the pain incident to the period of expectancy. It is for this reason that much of the distress such as morning sickness is avoided. All prospective fathers should see to it that the expectant mother is provided with a bottle of "Mother's Friend."

If more convenient get a bottle on your way home. Remember that many of our most valuable aids to health and comfort and safety are only such when our knowledge of them is put into action. Begin early to suggest its use and "Mother's Friend" will soon become one of the most helpful influences ever devised for avoiding much of the distress incident to coming motherhood.

The directions are simple. Get it at any drug store. It is applied by the expectant mother herself. It penetrates deeply and affords quick and splendid relief in a most gratifying manner and reflects a physical betterment to the nervous disposition of the lady. Don't fail to get a bottle of "Mother's Friend" today and then write Bradford Regulator Co., 715 Lamar Bldg., Atlanta, Ga., for a pretty little book brimful of information for expectant mothers. It is a delight to read it.

Mr. and Mrs. James Mitchell, of Clarksburg, were Sunday guests of Mr. and Mrs. Robert Mitchell.

Miss Lytle Workman is at Erie a guest of Mrs. G. C. Coffman.

Mr. and Mrs. Wade Lewis, of Johnstown, were Sunday guests of Mr. and Mrs. Bruce Norman.

Born to Mr. and Mrs. Russell Rogers a fine baby boy.

Thomas Williams and son, Roy, are both victims of measles.

Bruce Norman has been ill for several days.

Swedish chemists have found a way to remove from coal tar the finely divided carbon which it holds in suspension.

Nettles are used as food in Switzerland and other thrifty countries. They are said to be nearly as palatable as spinach.

## Proper Thing Now Is to Peel Off Soiled Skin

Those who abhor sticky, greasy, shiny, streaked complexions should religiously avoid creams, powders and rouges during the heated days. There's no need for them, anyway, since the virtues of mercuriolized wax have become known. No amount of perspiration will produce any evidence that you've been using the wax. As it is applied at bedtime and washed off in the morning, the complexion never looks like a make-up. Mercuriolized wax gradually takes off a bad complexion, instead of adding anything to make it worse. It has none of the disadvantages of cosmetics and accomplishes much more in keeping the complexion beautifully white, satiny and youthful. Just get an ounce of it at your druggist's and see what a few days' treatment will do. Use like cold cream.

Another effective warm weather treatment—heat tending to cause wrinkles and babbiness—is a skin-tightener made by dissolving 1 oz. powdered axolite in 1 pt. witch hazel. Its use (as a face bath) leaves no trace.

Buffalo has 10,983 licensed chauffeurs. There are 100,000 in New York state.
